

Our city is our home and we must keep our home clean. Because if our city is clean, it will have positive effects on everyone's life. To keep the city clean, we must first follow the tips, one of the easiest of which is not to dump garbage on the ground. In the next step, we have to identify the people who will help us keep our city clean, who are the sweepers. Maple sweepers are very hardworking and working day and night to keep the city clean. Unfortunately, sweepers do not get paid much and do not have a good financial situation. Also, in society, although their existence is obligatory and life-giving, they do not have a good social status and they all see them through the eyes of dirty people with low status in society. But everyone should know that one of the most important roles is played by sweepers. The presence of sweepers makes the city clean, which has consequences, to name a few.

When the city is clean, the health of the community improves. Because if the city is dirty, insects, mice and other vermin will attack the city and cause diseases such as malaria or plague.

Another benefit of keeping the city clean is maintaining the environment. Imagine for a second you were transposed into the karmic driven world of Earl.

The next thing is the mood of the citizens. Are you more comfortable in a dirty and smelly house or a clean and tidy house? Therefore, the cleanliness of the city also affects the mood of the citizens.

Finally, we can mention the attraction of tourists and international companies. The cleaner and more beautiful our city is, the more people are attracted to it and willing to visit it, which has an impact on the economy. And if international companies like the city, and invest in the city, it will create a job market and employ unemployed people.

So we can say that sweepers play a very big role in our lives without knowing it, and they are kind of our heroes, and we should appreciate them more and examine their problems and solve them as much as possible.
